Aspiring software developer passionate about building scalable, efficient, and user-focused solutions. Known for a strong foundation in core programming skills and a drive to stay updated with evolving technologies. Quick to learn and adapt, with hands-on experience in collaborative team environments. I aim to leverage my skills to contribute meaningfully to an organization. Seeking a challenging opportunity to grow alongside a team committed to innovation and excellence. Seeking an opportunity to make a meaningful impact and contribute to both personal and organizational growth.

EDUCATION

- M. Tech | CSE | Global Academy of Technology | 2025 | 9.61
- B. Tech | CSE | Presidency University | 2023 | 7.50
- XII | Sri Siddaganga PU College | 2019 | 78.17%
- X | J. S. S Public School | 2017 | 9.4

WORK EXPERIENCE

- **Frontend Developer Intern at Sapio Labs** Nov / 2024 – Jan / 2025
 - Worked on implementing categories and a dynamic menu listing for the web app. Leveraging Next.js for server-side rendering and seamless navigation. The focus is on optimizing performance and enhancing user interaction and crafted intuitive login and registration forms for streamlined access.

SKILLS

- **Programming Languages:** Java, Python
- **Web Technology:** HTML, CSS, Java Script
- **Databases:** MySQL
- **Frameworks:** React JS, Bootstrap, Tailwind CSS
- **Deployment:** Vercel, Render, Netlify, Git, GitHub

PROJECTS

- **Food Court:** Designed and developed Food Court, a fully functional, full-stack online food ordering platform built using the MERN stack. The project simulates a real-world food ordering system with a focus on mobile-first responsiveness, performance, and intuitive user experience.

Take aways:

- Gained hands-on experience in full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Strengthened skills in responsive, mobile-first design, ensuring seamless user experience across devices.
- Learned to develop RESTful APIs with Node.js and Express, handling routes, controllers, and middleware efficiently.
- Acquired expertise in MongoDB schema design and data modeling with Mongoose for structured and performant data management.
- Implemented JWT-based authentication and authorization, enhancing application security and session management.
- Gained experience in frontend state management using React hooks and component-driven architecture.
- Integrated Fastbot AI to explore intelligent automation in web applications and future-ready enhancements.
- Mastered the deployment of both frontend and backend on Render.com, including environment variable setup, domain management, and production configuration.
 - **Tech Stack:** MERN Stack, Fastbot Ai
 - **Source code:** <https://github.com/vikas9872/MiniProject>
 - **Live demo:** <https://foodcourttt.vercel.app/>

- **Portfolio:** Designed and developed a fully responsive and interactive developer portfolio to showcase personal projects, technical skills, education, and achievements. The website features key sections such as Home, About Me, Projects, Skills, Education, and Contact Me, all dynamically rendered using React.js. TailwindCSS was used to create a clean, modern interface with a strong focus on responsive design and accessibility. The portfolio delivers a professional user experience optimized for performance across all device types.

Take aways:

- Strengthened expertise in React.js by building dynamic, component-driven user interfaces with efficient state management and routing.
- Mastered TailwindCSS to design responsive, modern layouts while ensuring accessibility and consistent styling across all devices.
- Gained experience in building single-page applications (SPAs) with smooth navigation and dynamic content rendering.
- Focused on creating an intuitive and professional UI/UX design, prioritizing readability, colour contrast, and visual hierarchy.
- Implemented interactive features such as hover effects and animations to improve engagement and usability.
- Deployed the portfolio using Vercel, practicing real-world deployment workflows including custom domain configuration, continuous deployment, and build optimization.
- Enhanced proficiency with Git and GitHub for version control, managing feature branches, and maintaining a clean commit history.
- Developed a scalable, professional digital presence to effectively present technical skills, project work, and personal achievements.
 - **Tech Stack:** React JS, TailwindCSS
 - **Source code:** <https://github.com/vikas9872/vikasshanabhogportfolio>
 - **Live demo:** <https://vikasshanabhog.vercel.app/>
- **CityOne:** Designed and developed CityOne, a fully responsive web application that allows users to file public cleaning and maintenance complaints directly to city authorities. Built with Vite and React.js, the platform delivers fast load times, seamless routing, and a dynamic, component-driven user interface. Integrated Firebase for real-time database operations, user authentication, and live complaint tracking, enabling secure submissions and instant status updates. Styled with TailwindCSS, the application offers a clean, modern, and accessible design optimized for usability across all devices.
 - Gained practical experience with Vite for faster build times and modern frontend tooling in React projects.
 - Strengthened proficiency in React.js, focusing on component-based architecture and efficient state management using hooks.
 - Learned to implement real-time data handling and CRUD operations with Firebase Realtime Database.
 - Integrated Firebase Authentication to manage user sessions and ensure secure login/signup flows.
 - Designed fully responsive layouts using TailwindCSS, improving both visual design and accessibility.
 - Implemented client-side routing using React Router for smooth navigation across multiple sections.
 - Developed effective form validation and user feedback mechanisms for an improved user experience.
 - Improved project deployment readiness by structuring clean, maintainable frontend code with scalable architecture.
 - **Tech Stack:** React JS, TailwindCSS, Firebase
 - **Source code:** <https://github.com/vikas9872/cityone>
 - **Live demo:** <https://cityone.vercel.app/>
